

AUTOMATION TO EMPOWER EXCELLENCE

DELIVERING A NEW STANDARD IN FACILITIES MANAGEMENT

Pringle Robotics is committed to revolutionizing the facilities, EVS, and janitorial fields through purposeful automation and smart facility management solutions. Advanced autonomous robots for floor cleaning and intra-facility delivery pair with our integrated software solutions to deliver a new standard of efficiency, consistency, and value in facilities management.

Autonomous Floor Cleaning

CC1

Multipurpose Floor Cleaning Robot

HIGHLIGHTS

- Can cover 6,000-8,000 ft²/hr.
- Vacuum, mop, scrub, sweep
- Use on hard floors or low-pile carpet
- Switch between functions with one click
- One minute assembly and disassembly
- Cleaning reports provided
- Optional automatic workstation

CC3

Industrial-Grade Robot Floor Scrubber

HIGHLIGHTS

- Can cover 10,000-15,000 ft²/hr.
- Wet and dry cleaning modes for hard floors
- Easy maintenance and affordable parts
- 42L solution tank efficiently recycles water
- Cleaning reports provided
- Included automatic workstation

MT1

AI Powered Robotic Sweeper

HIGHLIGHTS

- The world's first AI-powered autonomous sweeper for large-scale commercial and industrial environments
- Detects, recognizes and sweeps all types of debris through AI learning and database updates
- IoT-ready to integrate with elevators, gates and automatic doors.

SH1

Smart Upright Scrubber Dryer

HIGHLIGHTS

- Combines the power of a walk-behind scrubber dryer with the ease of a mop
- Reduces cleaning time by 70%
- Ideal for greasy environments or complex layouts
- 9 different cleaning modes for multi-surface cleaning

CC5

Heavy-Duty 32-inch Autonomous Floor Scrubber

HIGHLIGHTS

- Can cover up to 40,000 ft²/hr
- Double roller brushes + double side brushes for simultaneous sweep & scrub
- Wet and dry cleaning modes for hard floors
- Automatic charging and water dumping/refilling station
- 140L solution tank + 170 L recovery tank
- Long lasting operation on one charge

FlashBoT

Autonomous Secured Delivery Robot

HIGHLIGHTS

- Secured unit with texted passcode
- Easily and safely takes the elevator for building-wide delivery
- Optional UV-C disinfection within chambers
- Configurable compartments creating 2, 3 or 4 sections

Intra-Facility Delivery

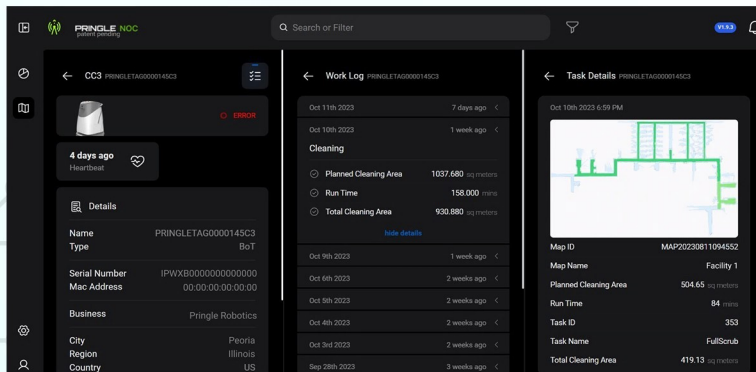

T300

Industrial Delivery Robot

HIGHLIGHTS

- Autonomously transports loads up to 660 lb
- VSLAM+ for rapid deployment across vast spaces
- Integrates with elevators and automatic doors
- Multiple modes including "follow me" and lifting to assist human workers

Software Integrations to Boost Efficiency

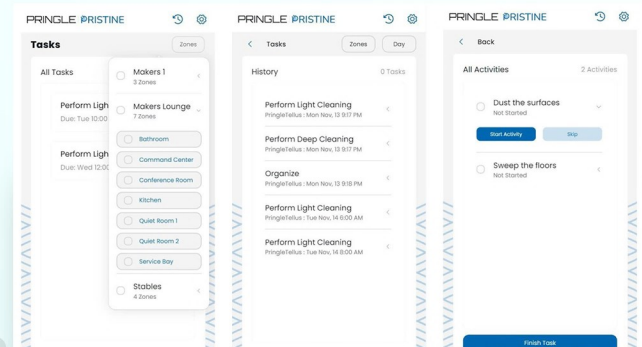

Our Network Operations Console lets facility custodial teams monitor, track and view detailed task reports from all connected robots, plus other assets like IoT sensors and standard cleaning equipment. Facility managers get vital insight into asset usage, health and workflow efficiency for absolute transparency and control.

PRINGLE PRISTINE

This custodial task management and tracking solution improves efficiency and reporting.

It incorporates data and workflows from Pringle NOC to build dynamic task lists and schedules, ensuring the most efficient use of staff time and providing assurance of work.
